

Installing FormFlow

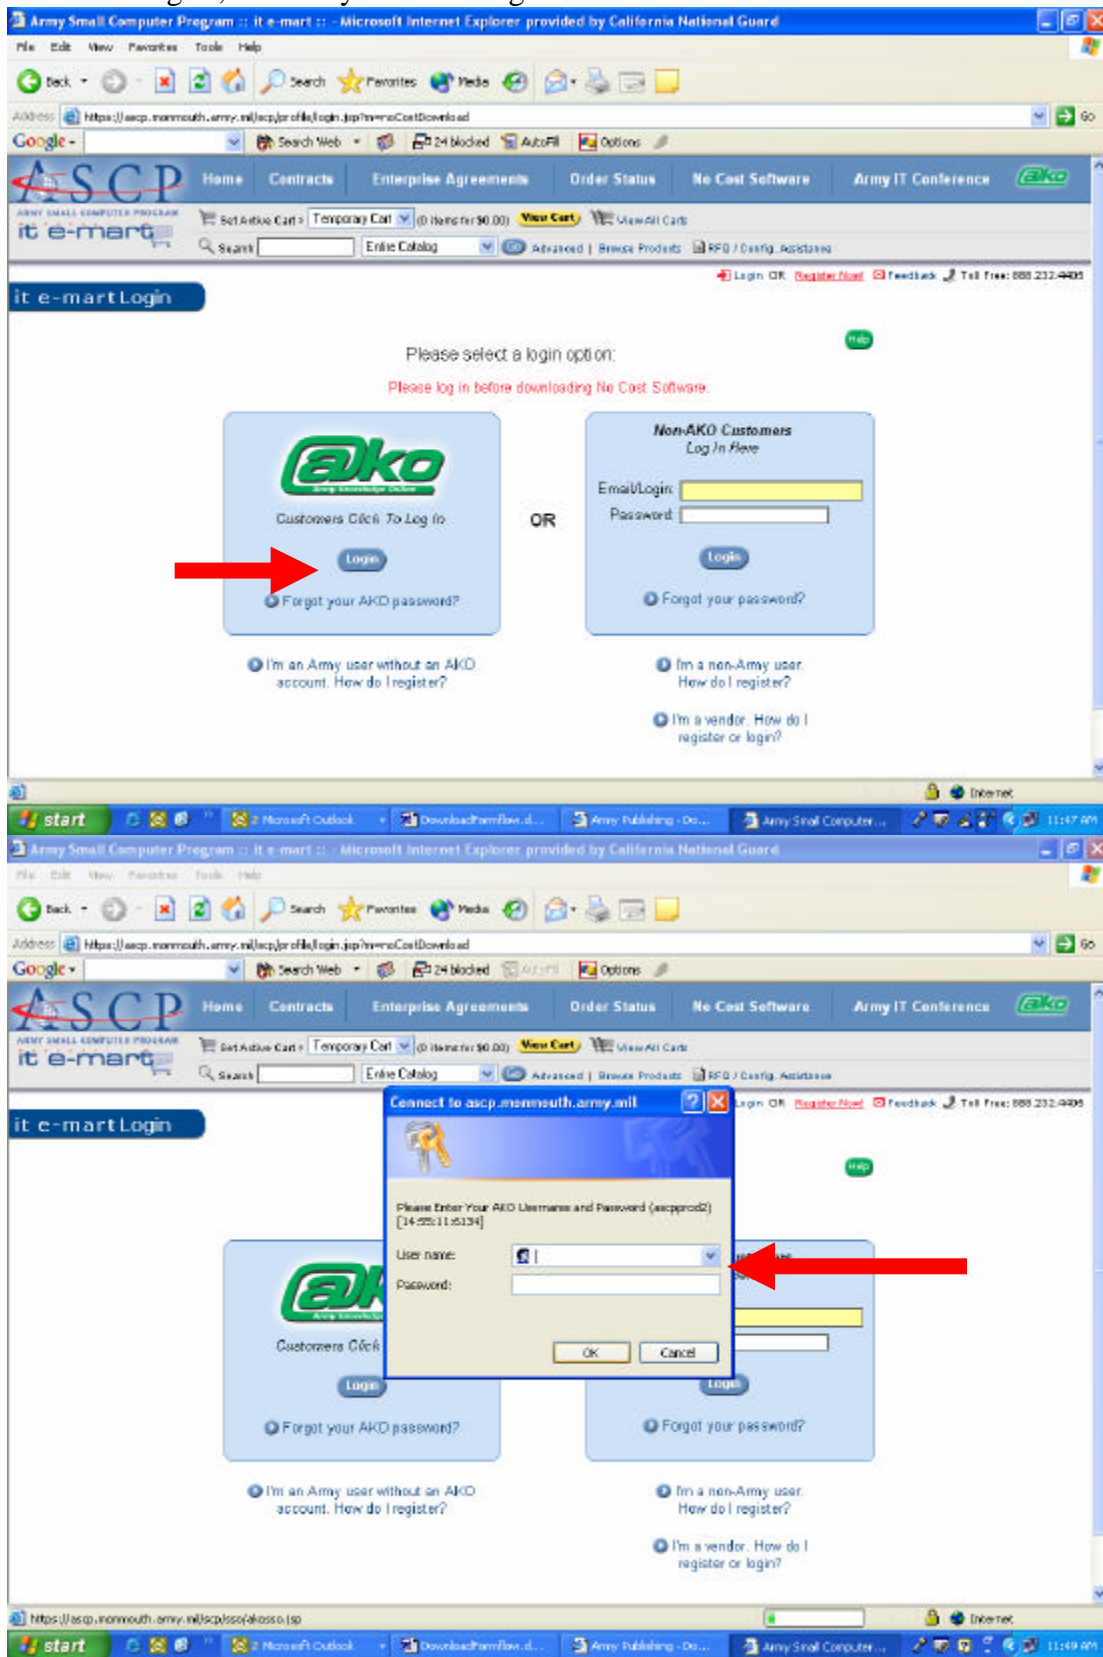

1. If you have any version of FormFlow or JetForm installed on your computer, **uninstall it**.
2. Go to http://www.usapa.army.mil/usapa_download.htm
3. Choose Get FormFlow Form Filler Software.

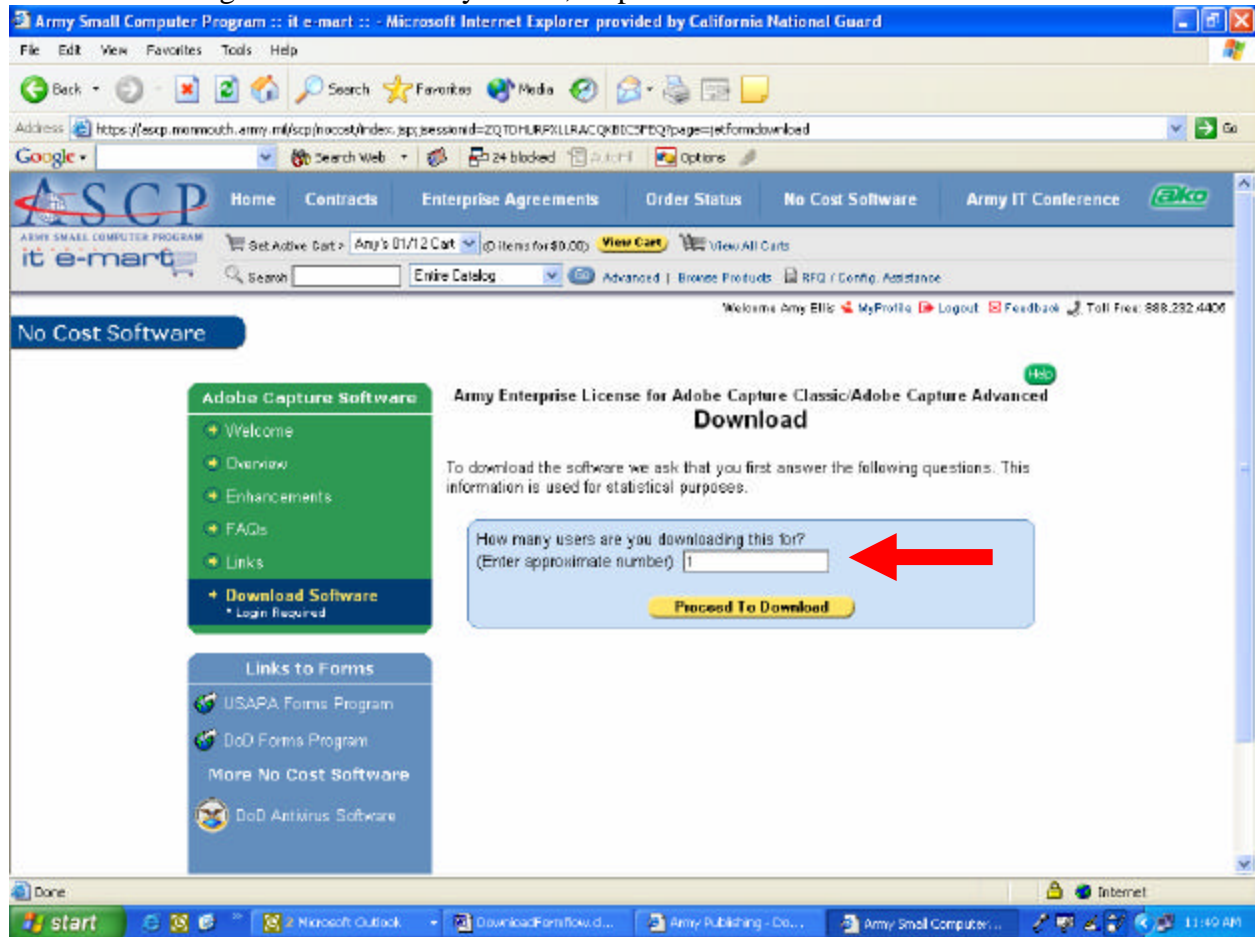

4. Choose Download Software.

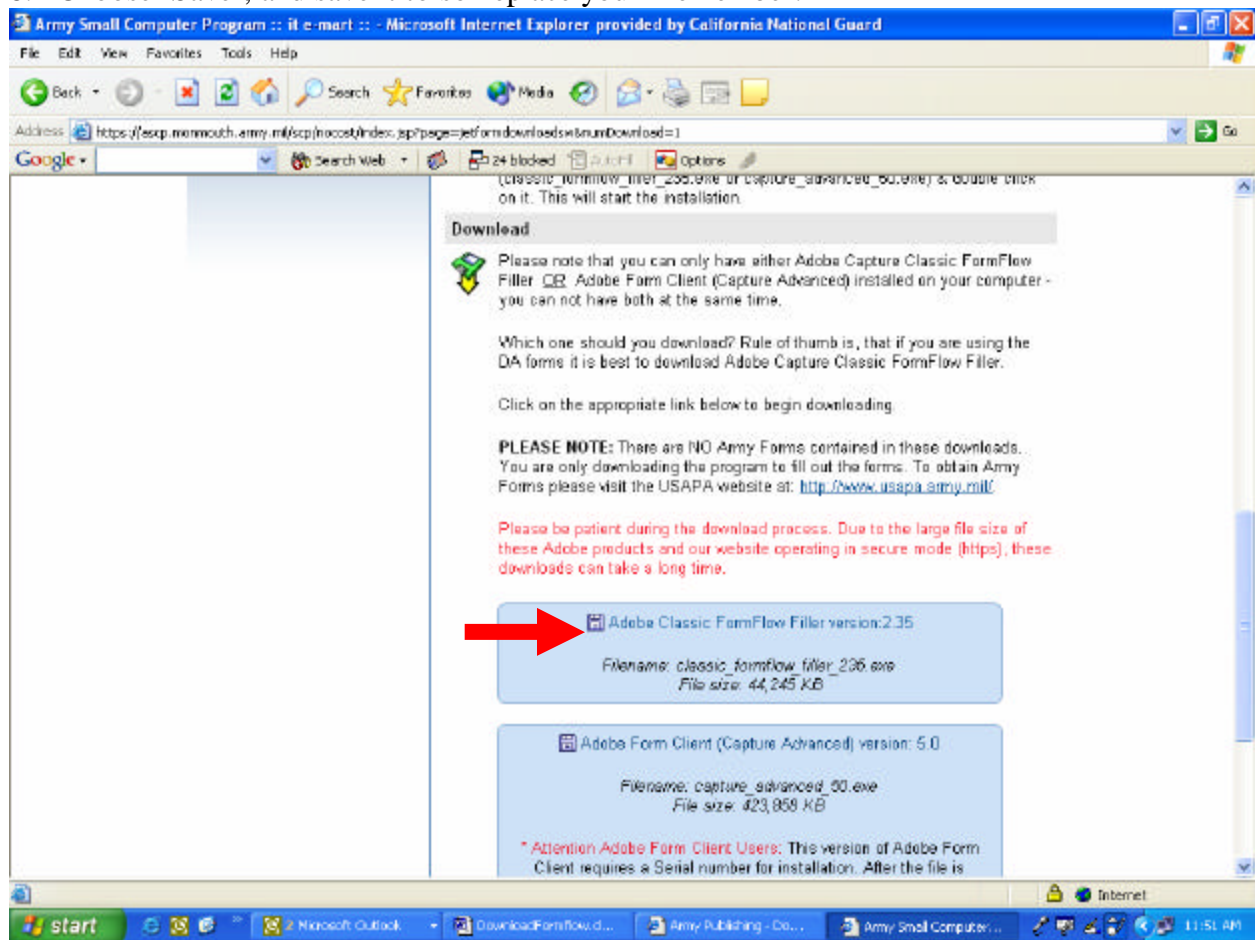

5. Click Log In, and use your AKO login.

6. You are using this software for yourself, so put 1 user.

7. Choose Adobe Classic FormFlow Filler version 2.35.
8. Choose 'Save', and save it to someplace you'll remember.

9. Find the file that got saved. It's called "**classic_formflow_filler_235.exe**". Double click to install, and follow the directions. Make sure you click '**Local**' install, accept the default location to install, and you can install both FormFlow and JetForm, or just FormFlow. Check only the Program Component. The other components are not needed. Don't use Century Splitting.
